## Action Report

### Student Feedback Summary and Response

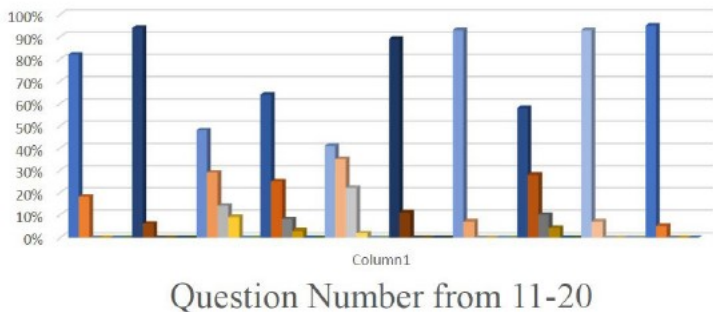

This report summarizes the feedback collected from students regarding their learning experience in the session 2023-24. The feedback was gathered through surveys conducted at the end of both odd and even semester. The purpose of this report is to highlight key insights from the student feedback and outline the actions that will be taken to address concerns and enhance the learning experience moving forward.

### Student satisfactory survey analysis

Question Number from 1-10

## Student satisfactory survey analysis

### Summary of Feedback

#### **Positive Feedback:**

- Students appreciated the relevance of the course content to real-world applications.
- Many students found the course materials (e.g., textbooks, readings, online resources) to be comprehensive and engaging.
- Students found the teaching style to be clear and organized.
- The use of multimedia (e.g., videos, interactive exercises) was appreciated by most students.
- Students generally felt that the assessments were fair and aligned with the course content.
- The grading was transparent, and students appreciated timely feedback on assignments.

#### **Suggestion for Improvement:**

- Some students requested more updated examples and case studies, particularly in emerging fields.
- A few students expressed that certain topics could be covered in more depth.
- A significant number of students requested more interactive learning activities, such as group discussions or hands-on projects.

- Some students indicated that the pace of the lectures was sometimes too fast, especially for complex topics.
- Several students mentioned that they would benefit from more detailed feedback on assignments and exams to understand where they could improve.
- A few students suggested diversifying the types of assessments (e.g., incorporating more project-based or practical assessments).

### **Action Plan and Response:**

- Update examples and case studies to reflect current trends and practices in the field, particularly those related to emerging technologies or industries.
- Introduce more in-depth exploration of key topics where students expressed the need for further understanding.
- Integrate more interactive activities such as small-group discussions, problem-solving exercises, and peer teaching opportunities to foster active learning.
- Adjust the pace of the lectures by providing additional review sessions for more complex topics or offering supplementary materials for students who need further clarification.
- Provide more detailed and constructive feedback on assignments, particularly on areas for improvement.
- Consider incorporating more diverse assessment methods, such as group projects or practical applications, to cater to different learning styles.
